

Instructions for PI-DU-MC1 Industrial Multi-Colored Hose Demo Unit

Finished Assembly

Interactive hose display featuring OIL-GLO® ULTRA and WATER-GLO® ULTRA dyes.

This 3D demo display unit is for tabletop, counter or tradeshow display use to help visibly illustrate glowing leak sites.

Items Included in the Kit:

- (1) LeakTracker™ Flashlight
- (1) Top Piece
- (1) Bottom Base Piece
- (1) Spectroline® Screwdriver
- (2) Brackets
- (4) Hoses
- (4) Screws
- (8) Hex Nuts

How to Assemble Unit:

1

1. Take the top piece and line up the bottom holes to the bracket on the bottom piece.

-Use the screwdriver to screw it in on both sides.

-When both pieces are connected the unit should be standing on its own.

2

2. Next, insert the hoses into the pre-drilled holes (**word side facing down**).

***Scan hoses with UV lamp to make sure the color matches to the appropriate labeled section**

3

3. Lastly, secure hoses in place by tightening the hex nut around the top and bottom of where the hoses are inserted.
